Let's give it a thought before flushing !

Everything that goes down the toilet has an effect on our environment!
Here are some things that can block up the pipes, jam the pumps and pollute the planet.

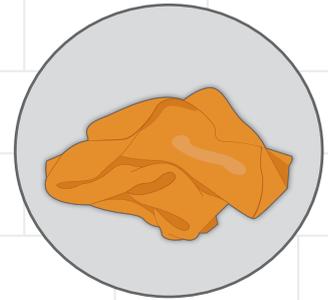

Sanitary towels, diapers and tampons

Hair

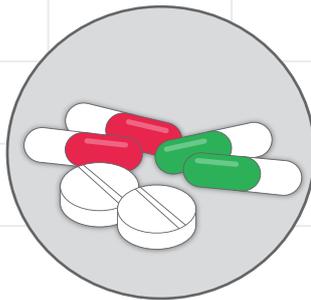

Plastic bags

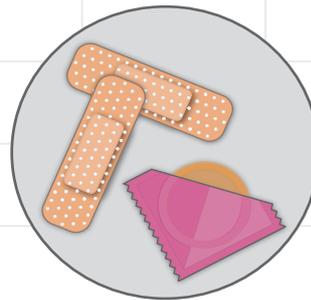

Underwear and rags

Wet wipes

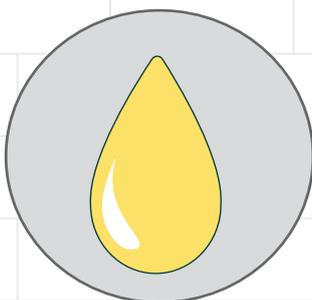

Drugs and pills

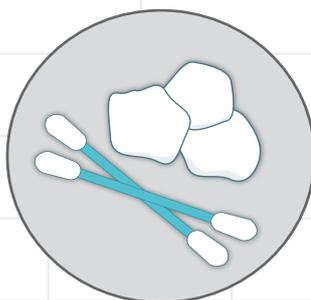

Plasters, condoms and bandages

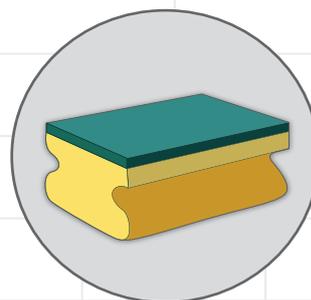

Cat litter

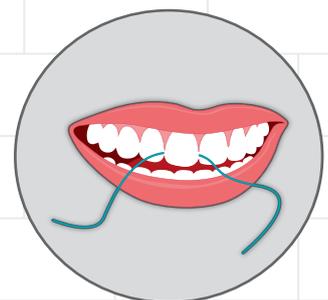

Oils or other grease

Q-tips and cotton balls

Sponges

Dental floss

Remember, the toilet is not a trash can!

Drugs and medicines should be returned to a chemist.
